

Stingray – St Johns, Newfoundland Broadcast Engineer

Stingray St Johns has an exciting opportunity for a Broadcast Engineer to work in Newfoundland Labrador. The successful candidate will be responsible for the following:

- Engineering duties for all Stingray Newfoundland Labrador properties and will be based in St Johns.
- Maintenance, repair and installation of audio and transmission equipment.
- Maintenance of audio related computer equipment and associated servers/networks.
- Develop and maintain engineering department records and drawings using Visio and Excel.
- Assist with technical requirements for remote broadcasts.
- After-hours on call duties as required.
- Travel within the province required to assist with tower maintenance and/or station maintenance requirements within geographic region.

The successful applicant should have the following qualities, attributes, and experience level:

- Knowledge and experience with AM\FM transmission systems.
- Experience with Wide Orbit Automation and Axia Audio systems is an asset.
- Post-secondary school graduate from recognized technical institute in broadcast electronics. One to three years industry experience is desirable, although recent graduates from a post-secondary institution will be considered
- Ability to work with minimal supervision.
- Mature, calm and professional manner.
- Able to take instruction with ease; willing to learn.
- Proven display of initiative.
- A valid driver's license (abstract may be required).
