

Estimator

St. John's, NL

Who are we?

The Cahill Group is one of the largest multi-disciplinary construction companies in Canada. Cahill is building the future of oil and gas, mining, hydro, and social infrastructure on some of the largest construction and fabrication project sites in the country.

People really are at the heart of everything we do. So, we will always put the health, well-being, and safety of our people above all. We take care of our people, through investment, training, competitive compensation, health plan benefits, and unique programs to support the health and well-being of you and your family. Cahill is currently recruiting **Mechanical and Electrical Estimators** to help support some of the best-in-class projects across Canada in the energy, mining, manufacturing, water and wastewater, and institutional sectors.

What will you do?

- Attend site visits, review and critically analyze tender documents for unclear technical or commercial items, and submit queries to the client for a response, the consciousness of other disciplines for interfaces or interferences
- Perform take-offs, obtain pricing from the supply chain, and participate in the development of project schedules and execution plans.
- Develop a bid preparation schedule identifying the tasks, assignments, and deadlines, for the preparation of more complex bids
- Develop takeoffs to ensure it is aligned with tracking requirements for job cost and schedule – per system, per drawing, per floor, and by phase, requesting quoted prices, identifying subcontractors, and estimating project expenses with the appropriate management.
- Develop and adhere to estimate breakdown standards, compile a risk register for management review, and prepare submittal documents
- Prepare final estimate breakdowns and analyze each section for scope, price, and completeness
- Participate in estimate reviews prior to submittal to the client
- Complete post-bid analyses on jobs bid and document lessons learned
- Integrate lessons learned and tracking from Project back into historical data for future reference

What will you bring?

- 3-5 years of construction estimating experience or 3-5 years of field experience
- Mechanical or Electrical engineering degree, diploma, or trade certification

- Knowledge of Accubid/Trimble estimating software packages or similar is an asset; training can be provided
- Must be able to read and interpret construction drawings and specifications
- Ability to strategically make decisions under pressure

If you are interested in joining our growing team, please apply in confidence. Cahill is an equal opportunity organization. While we thank all applicants for their interest, only those under consideration will be contacted
