Responsibilities:

- Keeping detailed and accurate maintenance reports and documentation
- Cleaning, lubricating, and performing other routine maintenance work on Diesel Generators
- Working outside in all weather conditions
- Troubleshooting diesel generator and routine maintenance
- Maintain inventory of all site consumables and area ports
- Work with site team on deliveries

Qualifications:

- Journey person certificate required
- Experience with large diesel generators and rotating equipment is required
- Experience in an industrial site is required
- Electrical experience is considered an asset
- Experience with high voltage electrical distribution equipment would be considered an asset
- Valid Fall Arrest Certification
- Valid Aerial Work Platform Certification
- Strong safety culture

Rotation Schedule:

- 2 weeks on/2 weeks off

Job Duration:

This position is a project-based role and is required for the duration of the project. This is subject to change as project requirements dictate.

If you are interested in joining our growing team, please apply at <https://cahill.ca/careers/>. Please ensure you include your full name, address, community and province when applying. Deadline for applications will be 5:30pm NST on **January 24, 2023.**

Iskueteu is an equal opportunity employer; however, we recognize the commitments made in the Innu and Inuit Impacts and Benefits Agreements and preference will be given to qualified Innu Nation

members and beneficiaries of the Labrador Inuit Lands Claims Agreement. It also recognizes a commitment to give qualified workers from Labrador priority for employment opportunities. Innu Nation members and Nunatsiavut beneficiaries can also apply through Vale's Aboriginal Employment Coordinators.

While we thank all applicants for their interest, only those under consideration will be contacted.
