This position is located at the Project site, working on a 14 days in/14 days out rotation.

Accountabilities/Responsibilities:

- Demonstrates leadership in Health, Safety and Environment through personal behaviors and conversations.
- Establish and promote a respectful and healthy work environment at all times.
- Be a courageous health, safety, and environment leader, adhere to and promote health, safety and environmental standards, policies and procedures.
- Conduct daily, weekly and monthly general inspections of the work areas and document findings and resolutions.
- Promote a proactive approach of continuous improvement by reporting all Health, Safety and Environment incidents and proactively resolve and communicate solutions.
- Participate in Health, Safety and Environment initiatives, reviews, and investigations.
- Lead and empower employees in achieving operating targets and improve employee work performance and efficiency through mentorship, coaching, and feedback.
- Supervise and develop a safe and efficient maintenance team, to meet maintenance KPIs, including schedules and production targets.
- Manage, monitor, and adhere to the approved maintenance work management program by ensuring compliance to planned and scheduled work orders.
- Allocate maintenance coverage for breakdowns. Participate, investigate, document, and resolve on the job issues (with regards to planned maintenance activities, maintenance shutdowns, etc.)
- Interface with planners and Supervisors to assist in planning and scheduling of work.

- Control non-standard maintenance situations with immediate actions and proactively scan the maintenance operation for improvements.
- Adhere to all company policies and procedures.
- Perform other duties as assigned.
- Dayshift & nightshift work is required

Education and Experience Required:

- A post-secondary degree/diploma in Mechanical Engineering or relevant would be an asset.
- Journeyperson Certificate & red seal in a Mechanical Trade
- Extensive heavy duty mining equipment experience, preferably in a Surface Mining Environment
- Minimum of 10 year's overall experience in a maintenance environment; including 5 years' leadership experience.
- Minimum 2 years' experience in Maintenance Supervision, Maintenance Planning, or a closely related discipline in a heavy industrial or mining environment.
- Experience working in a remote industrial environment is preferred.

Skills and Knowledge:

- Knowledge of health, safety, and environmental requirements at remote sites.
- Strong knowledge of open pit mining processes is required.
- Development, coaching and training coordination of all direct reports to help team succeed.
- Strong knowledge of the OHS, mining, and construction regulations.
- Effective time management and organizational skills and able to manage multiple priorities.
- Strong computer skills with competence using Microsoft Office products.
- Ability to influence and inspire others and manage cross-functional relationships.
- Strong knowledge and experience in Operations and Maintenance systems, processes and facilities.
- Ability to quickly evaluate complex issues and identify resolutions.
- Experience with ERP systems.
- Experience in the maintenance and repair of mechanical or electrical equipment.
- Experience in dealing with contract services and manufacturer representatives.
- Ability to influence and inspire others and manage cross-functional relationships.
- Strong knowledge of heavy equipment and light vehicle maintenance and repair in a mining environment.
- A valid driver license and a driver's abstract.
