

Calibre Mining Corporation is engaged in the exploration and development of the Valentine Gold Mine located in the central region of Newfoundland and Labrador. Once in production, it will be the largest gold mine in Atlantic Canada and a major employer in the province. Calibre is a public corporation (TSX:CXB) headquartered in Vancouver, British Columbia with a regional office located in Grand Falls-Windsor, NL.

Additional corporate and Project information is available at [www.calibremining.com](http://www.calibremining.com)

Calibre is currently inviting applications for a Process Plant Electrical Supervisor to join our growing team as the company transitions from mine construction to mine operations.

## **Process Plant Electrical Supervisor**

Reporting to the Process Plant Maintenance Superintendent, the Process Plant Electrical Supervisor role is responsible for the safe and effective supervision, planning, and oversight for a team of electricians and instrumentation technicians to ensure quality of work performed. This role will provide technical guidance regarding the installation, maintenance, and repair of electrical systems. In addition, the incumbent will execute the day-to-day safe work of the team and be a liaison between operations, planning, work execution, and develop and enhance a work environment that motivates employees to achieve exceptional performance.

In this role you will lead a team in the development and execution of work activities by consistently applying safe work practices.

This position is located at the Project site, working on a 14 days in/14 days out rotation.

### **Accountabilities/Responsibilities:**

- Promote a proactive approach of continuous improvement by reporting all Health, Safety, and Environment incidents and communicate solutions.
- Participate in Health, Safety, and Environment initiatives, reviews, and investigations.
- Lead and empower employees in achieving operating targets and improve employee work performance and efficiency through mentorship, coaching, and feedback.
- Supervise and develop a safe and efficient maintenance team to meet maintenance schedules and production targets.
- Manage, monitor, and adhere to the approved maintenance work management program by ensuring compliance to planned and scheduled work orders.
- Allocate maintenance coverage for breakdowns.
- Participate, investigate, and resolve on the job issues (with regards to planned maintenance activities, maintenance shutdowns, etc.)
- Interface with planners and supervisors to assist in planning and scheduling of work.
- Control non-standard maintenance situations with immediate actions and proactively scan the maintenance operation for improvements.

- Provide effective care, maintenance, and utilization of assets.
- Provide technical guidance and support to the electrical team.
- Focus on achieving the daily and weekly work plan and contribute to the development of monthly and quarterly plans.
- Adhere to all company policies and procedures.
- Perform other duties as assigned.

#### **Education and Experience:**

- A post-secondary degree/diploma in Electrical Engineering or relevant discipline.
- Minimum of 10 years' overall experience in a maintenance environment; including 5 years' leadership experience.
- Experience working in a remote industrial environment is preferred.
- A valid driver's license and drivers abstract required.

#### **Skills and Knowledge:**

- Knowledge of health, safety, and environmental requirements at remote sites.
- Strong knowledge of open pit mining processes is required.
- Development, coaching, and training coordination of all direct reports to help the team succeed.
- Strong knowledge of the OHS, mining, and construction regulations.
- Effective time management and organizational skills and able to manage multiple priorities.
- Strong computer skills with competence using Microsoft Office products.
- Ability to influence and inspire others and manage cross-functional relationships.
- Strong knowledge and experience in Operations and Maintenance systems, processes, and facilities.
- Ability to quickly evaluate complex issues and identify resolutions.
- Experience with ERP systems.
- Experience in the maintenance and repair of mechanical or electrical equipment.
- Experience in dealing with contract services and manufacturer representatives.
- Ability to influence and inspire others and manage cross-functional relationships.
- Strong knowledge of heavy equipment and light vehicle maintenance and repair in a mining environment.

Calibre is an equal opportunity employer committed to local hiring preferences and all applications will be considered on this basis. We value equity and diversity and are committed to creating an inclusive workplace environment for all employees. Calibre reserves the right to hire only those candidates who are appropriately qualified for the position advertised.

Calibre will review all applications; however, we will only contact those candidates who best fit the requirements.
